Scope and Motivation

Recently, after the unmatched popularity achieved during the dot-com bubble era, optics is gaining back attention. In particular, the development of new bandwidth and QoS-greedy applications (e.g., IPTV, peer-to-peer communications) and the ubiquitous high-speed access offered by wireless technologies (e.g., WiMAX and LTE) are fostering the deployment of optical access technologies for both direct user access or as a backhaul for wireless access networks. The increase of traffic injected by hybrid wired and wireless access and metro networks is then foreseen to foster the further development of all-optical core networks. In addition optical systems are being applied to sensing and life science (e.g., biophotonics) besides the traditional communications field. Moreover optical networks are considered for supporting interprocess communications, from optical network support for grid computing to chip-to-chip and board-to-board communications. Furthermore even in optical networks and systems interests are growing toward energy efficient "green" solutions. Finally new modulation formats are being studied and tested. The Optical Network and System Symposium aims at bringing together experts working in several of the aforementioned fields. Among the main topics addressed by the symposium will be optical network data, control, and management plane, all-optical network physical impairments, novel optical modulation techniques, and energy efficiency in optical networks.

Main Topics of Interest

- Wavelength division multiplexing
- Optical time-division and code-division multiplexing
- Optical modulation and signal processing
- Modulation and coding for optical transmission
- Optical transmission systems and performance monitoring
- Optical system modeling and performance evaluation
- Optical switching technologies, devices, and architectures
- Optical crossconnects and add drop multiplexers
- Dispersion and nonlinearity management in optical networks
- IP-WDM integration
- Optical network architectures
- All-optical networks
- Optical network design and reconfiguration
- Optical network control and management
- Optical networks performance evaluation
- Routing and wavelength assignment
- Traffic grooming and traffic engineering
- Dynamic traffic management in optical networks

- Multi-granularity switching
- Optical Packet Switching
- Optical Burst Switching
- Protection and restoration in optical and multi-layer networks
- Optical access networks
- Optical Networks in support of Grid and Cloud Computing
- Storage networks
- Free space optics
- Terrestrial and submarine optical networks
- Optical network security
- Optical virtual private networks
- Optical network experiments: demonstrations, test beds and field trials
- Signaling and monitoring in optical networks
- Physical-layer impairment-aware optical network design and traffic engineering
- Multi-domain optical communications
- MAC protocols in optical networks
- Optical network standardization issues
- Efficient simulation techniques for optical networks
- Applications requiring optical networks
- Optical network and system testbed and field trials
- Optical Interconnects
- Energy efficient/green optical networks and systems
- Optical broadcast, multicast, manycast, and anycast
- Advance reservation over optical networks
- Monitoring in all-optical networks
- Optical networks for research & education (R&E) networks
- Optical networks for future Internet design
- Multi-domain and multi-layer optical networks
- Optical sensing
- Biophotonics
- Short reach optics
- Optical and wireless network integration
- Radio over fiber
- Quantum cryptography

Technical Program Committee

Nail Akar, Bilkent University (akar@ee.bilkent.edu.tr)

Hussein Alnuweiri , Texas A&M University , Qatar(hussein.alnuweiri@qatar.tamu.edu)

Vishal Anand, State University of New York at Brockport , (vanand@brockport.edu)

Chadi Assi, Concordia University (assi@ciise.concordia.ca)

Ilia Baldine, Renaissance Computing Institute, UNC-CH (ibaldin@renci.org)

Balagangadhar Bathula, Columbia University, (bbathula@ee.columbia.edu)

Alejandra Beghelli, Universidad Tecnica Federico Santa Maria (alejandra.beghelli@usm.cl)

Andrea Bianco, Politecnico di Torino (bianco@polito.it)

Sebastien Bigo, Bell Labs, Alcatel-Lucent (sebastien.bigo@alcatel-lucent.com)

Pierpaolo Boffi, POLITECNICO di MILANO (boffi@elet.polimi.it)

Maite Brandt-Pearce, University of Virginia (mb-p@virginia.edu)

Franco Callegati, Universita` di Bologna (franco.callegati@unibo.it)

Hakki Cankaya, Alcatel-Lucent , USA (candan@enr.smu.edu)
Xiaojun Cao, Georgia State University (cao@cs.gsu.edu)
Davide Careglio, Universitat Politecnica de Catalunya (careglio@ac.upc.edu)
Cicek Cavdar, Istanbul Technical University (cicek.cavdar@gmail.com)
Vincent Chan, Massachusetts Institute of Technology (chan@mit.edu)
Gee-Kung Chang, Georia Tech (gkchang@ece.gatech.edu)
Piotr Cholda, AGH University of Science and Technology (piotr.cholda@ieee.org)
Yun C. Chung, KAIST (ychung@ee.kaist.ac.kr)
Filippo Cugini, CNIT, Italy (filippo.cugini@cnit.it)
Grzegorz Danilewicz, Poznan University of Technology (grzegorz.danilewicz@et.put.poznan.pl)
Jitender Deogun, University of Nebraska-Lincoln (deogun@cse.unl.edu)
Jerzy Domzal, AGH University of Science and Technology (jdomzal@kt.agh.edu.pl)
John Doucette, University of Alberta (john.doucette@ualberta.ca)
Rudra Dutta, North Carolina State University (dutta@csc.ncsu.edu)
Frank Effenberger, HUAWEI (feffenberger@huawei.com)
Tarek El-Bawab, Jackson State University (telbawab@ieee.org)
Halima Elbiaze, University of Quebec at Montreal (elbiaze.halima@uqam.ca)
Georgios Ellinas, University of Cyprus (gellinas@ucy.ac.cy)
Vincenzo Eramo, University of Rome "La Sapienza" (Vincenzo.Eramo@uniroma1.it)
Farid Farahmand, Sonoma State University (farid.farahmand@flash.net)
Maurice Gagnaire, Ecole Nationale Superieure des Telecommunications (gagnaire@telecom-paristech.fr)
Joan Garcia-Haro, Polytechnic University of Cartagena (joang.haro@upct.es)
Roberto Gaudino, Politecnico di Torino (gaudino@polito.it)
