

## Call for Papers

### Communication Software, Services, and Multimedia Application Symposium

#### SYMPOSIUM CO-CHAIRS:

**Hacène Fouchal**, Université de Reims Champagne-Ardenne, Reims, France

**Guosen Yue**, Wireless Access Lab, Futurewei Technologies, Inc., USA

#### SCOPE AND MOTIVATION:

IEEE GlobeCom 2019 will be held at Big Island, Hawaii, USA, 9-13 December 2019. It will exhibit an exciting technical program including more than 10 Symposia highlighting recent progress in all major areas of communications.

The Communication Software, Services, and Multimedia Application Symposium will provide a platform to present state-of-the-art research work on challenging issues related to software design, deployment, delivering, and management of services and multimedia applications. It will also provide an opportunity for face-to-face discussions and information sharing among experts from both academia and industry.

The symposium is sponsored by IEEE ComSoc Communication Software (TCCS) and Multimedia Communications (MMTC) technical committees.

#### MAIN TOPICS OF INTEREST:

The Communications Software, Services, and Multimedia Application Symposium covers challenges and advances for Network Softwarization and Enablers, service delivery, management, and multimedia applications in fixed and mobile communication networks.

The Symposium solicits original contributions in, but not limited to, the following topical areas:

- **Network Softwarization & Services**
  - ✧ Network function virtualization
  - ✧ Service function chaining
  - ✧ Resource sharing & isolation
  - ✧ Software defined networking
  - ✧ Virtualization technologies/techniques
  - ✧ (mobile/multi-access) edge and fog computing
  - ✧ MEC-, SDN-, NFV-based network services
  - ✧ Service, slice, and infrastructure monitoring

## IEEE Global Communications Conference

9-13 December 2019 • Big Island, Hawaii, USA

*Revolutionizing Communications*

### CALL FOR PAPERS AND PROPOSALS

- ✧ Performance, interoperability, and scalability challenges/issues
  - ✧ Security and privacy issues in virtualized environments
  - ✧ Mobile core networks and their slicing
  - ✧ Slice programmability, modeling, composition algorithms and deployment
  - ✧ Network/service orchestration and management
  - ✧ Experimental testbeds, trials and deployment
  - ✧ Business models & new verticals
  - ✧ Model and delivery platforms
  - ✧ Scalable video delivery
  - ✧ Cooperative networking for streaming media content
  - ✧ Service overlay networks
  - ✧ Massive network data analytics
  - ✧ Machine learning for network service enhancement
  - ✧ Proactive management of the softwarized network infrastructures
  - ✧ Distributed systems and applications, including Grid Services
  - ✧ Convergence of communication and global services
  - ✧ Communications software in vehicular communications
  - ✧ Architectures for cooperative communications and ubiquitous computing
  - ✧ Software Defined Radio Access Network (RAN)
- **Quality in Services and Multimedia Applications**
    - ✧ Quality of Experience (QoE) modelling and metrics
    - ✧ Adoption of QoE metrics and models for assessment, control and management of multimedia services
    - ✧ Strategies of End-to-End QoE management
    - ✧ Quality-oriented routing algorithms
    - ✧ Video quality assessment and impairment concealment
    - ✧ Performance studies of digital media ecosystem
    - ✧ High quality service provisioning for multimedia applications
- **Multimedia Systems and Services**
    - ✧ Multimedia cloud services
    - ✧ Multimedia streaming, multicast and broadcast services
    - ✧ Web Services and distributed SW technology
    - ✧ IMS and multimedia services o Home and entertainment digital media ecosystem
    - ✧ IPTV service and home networking
    - ✧ Triple and Quadruple play services
    - ✧ P2P and P2P-SIP services

- ✧ Machine learning techniques for multimedia content analysis
  - ✧ Machine learning techniques for video delivery and service
  - ✧ Multimedia Big data and social media
  - ✧ Multimedia security and privacy
  - ✧ Multimedia Edge Computing and Fog Communication
- **Service Management**
    - ✧ Security and privacy in network and service management
    - ✧ Scalability and reliability issues
    - ✧ Charging, pricing, business models
    - ✧ Context awareness and personalization
    - ✧ Next generation services and emerging threats
    - ✧ Cross-layer optimization for multimedia service support

**IMPORTANT DATES :**

- Paper Submission: 15 April 2019,
- Acceptance Notification: 15 July 2019,
- Camera-Ready: 16 Aug 2019,

**IMPORTANT DATES :**
